

EDITORIAL DIGEST

THIS WEEK IN BITCOIN CORE

2026-09-14 – 2026-09-20

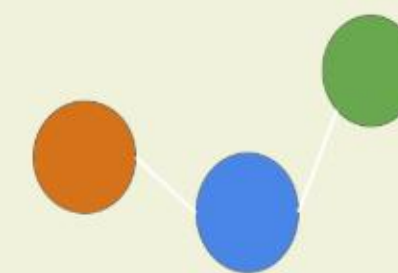

“

Ongoing fundamental research into future protocol evolution, with discussions centered on integrating Post-Quantum Cryptography (PQC) output types and exploring Block-wide Signature Aggregation via SNARKs to address long-term security and scalability challenges.

Complete pull request breakdowns, maintainer reviews, and developer discussions across Bitcoin Core.

WEEKLY VELOCITY

PROTOCOL DEBATES

Delving Bitcoin & Core Dev Meeting

SECURITY

Post-Quantum Cryptography

Active evaluation of future-proof output types and quantum migration schemes.

SCALABILITY

SNARK Block Aggregation

Exploring signature aggregation across whole blocks to compress transaction verification data.

WALLET TECH

Miniscript & Descriptors

Refinements in how complex script expressions and validatable Descriptor IDs are parsed.

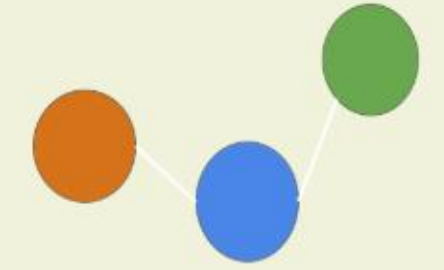

GUI & QML

QML Desktop Interface

Working group progress modernizing Bitcoin Core's desktop GUI and privacy broadcast boundaries.
